

Marte Meo – "on one's own strength"

Learn to read the message behind the problem behaviour!!

The 18 May 2022, we have the honour to welcome Maria Aarts, Marte Meo's founder, to Hässleholm in Sweden. Maria Aarts comes from Eindhoven in the Netherlands and is considered as one of the world's foremost specialists in understanding and interpreting human interaction. With sharp eye, she reads the interaction and guides her audience through films from everyday interaction so that everyone can understand and pick up some of her knowledge in their professional practice.

Maria will speak based on films from different activities from different parts of the world that in some way work with children, young people or elderly. By mixing films, she gives the audience a greater understanding of how similar our needs are through life, regardless of age. How we can create development, consensus and harmony with our approach. The lecture focuses extra on how we can meet people with some form of neuropsychiatric functional variant.

Maria has the ability to teach us to see the important in relationships and interactions, and makes the complicated concrete, simple and useful. With the help of the film, Maria connects theory with reality and helps us build on the good interaction.

Welcome to enjoy this awesome woman and lecturer who in a personal, warm and humorous way shares her knowledge.
